Please amend claim 16 as follow:

Reasons for Allowance

6. The following is an examiner's statement of reasons for allowance:

In the Examiner's Office Action for non-Final Rejection of March 7, 2006, 35 U.S.C. § 103, rejections was primarily based on Underwood: "SYSTEM, METHOD AND ARTICLE OF MANUFACTURE FOR AN ACTIVITY FRAMEWORK DESIGN IN AN E-COMMERCE BASED ENVIRONMENT", U.S. Patent 6,718,535, filed JULY 30, 1999 and issued April 6, 2004; in view of Powell et al.: "INTERNET CONTENT DELIVERY ACCELERATION SYSTEM EMPLOYING A HYBRID CONTENT SELECTION SCHEME", U.S. Patent Application 2002/0073167, filed December 7, 2000 and published June 13, 2002, hereafter "Powell".

In the response filed on August 4, 2006 to Examiner's non-Final Rejection of March 7, 2006, concerning claim 1, Applicant argued that neither Powell nor Underwood are directed to systems which cache results from queries to a database, in particular, the references alone or in combination, does not disclose a remote server unit to process

queries through a cache DBMS server which checks a data structure consisting of query predicates. Applicant noted that query predicates are the components that make up or define a database query and argued that the proxy server of Powell may determine whether a digital object is cached based upon the URL of a received HTTP request, which would not equate the HTTP request with the query or equate the URL of the HTTP request with a query predicate. Further, Applicant argued neither reference discloses a database subscription manager that derives query results front a central DBMS server, sends the query results to a remote server unit, and creates a subscription to the query predicate, or adding the query predicate to the query predicate data structure.

Concerning claims 11 and 12, Applicant further argued the cited sections of the references as well as others teaching database client driver that includes a resource abstraction layer, and a plurality of predicates or equivalents be derived from the plurality of transactions, respectively.

Concerning claim 13, Applicant mainly argued the teaching of identifying predicates in a cache database and locking the predicates in the cache database and alleged the cited references fail to provide the teaching.

Concerning claim 14, Applicant argued that the cited references teaching on HTTP request is not a commit request, which is not equivalent to Applicant's receiving a commit request on the remote server unit from the application server.

Concerning claim 17, Applicant specifically pointed out that "opening a pool of serialized transactions on the central DBMS server" is not taught by either reference.

Regarding Applicant's lengthy argument concerning references' teaching, Applicant's claimed subject matter mainly falls in two categories:

proxy server for users, drive local query result from a cache database and a central database, creating query predicate, adding query result to cache database and query predicate to a data structure; and implementing transaction isolation by opening a pool of serializable transaction, associating/opening the transaction, sending the transaction for processing and sending a rollback or commit message to remote server, as described in detail in the independent claims 1, 11-14 and 17.

An updated search for the prior arts on EAST database and on domains (NPL-ACM, Google.com, NPL-IEEE) has been conducted. The prior arts searched and investigated in the database and domains does not fairly teach or suggest the teaching of the claimed subject matter as described above and reflected by the combined elements in each of the independent claims 1, 11-14 and 17.

The dependent claim(s) in the groups (2-10) and (15), depending claims 1 and 14, respectively, also distinct from the prior art for the same reason.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
